PROFESSIONAL SUMMARY

Senior Frontend Engineer with 7+ years of experience building scalable, high-performance web applications using React and TypeScript. Experienced in remote, async-first environments, collaborating with distributed teams across multiple time zones and flexible with working hours to match global business needs. Proven track record of leading frontend architecture decisions, mentoring engineers, and driving best practices across large, evolving codebases. Actively integrates AI-assisted development tools, including Claude Code and Cursor, into daily workflows to improve throughput and code quality.

TECHNICAL SKILLS

- **Frontend Frameworks & Libraries:** React.js, Next.js, Svelte.js, Redux, Zustand, Redux Thunk, Redux Saga
- **AI & Intelligent Tooling:** Claude Code, Cursor, Windsurf, Lovable, GitHub Copilot (*if applicable*)
- **UI & Design Systems:** Tailwind CSS, Material UI, Ant Design, Storybook, Reactstrap, Melt UI, Skeleton UI, Reshaped
- **Data Fetching & Visualization:** REST APIs, GraphQL, React Query, Axios, Fetch API, Recharts, React Table
- **Backend & Databases:** Node.js, Firebase, Firestore, MongoDB, FaunaDB, MySQL, Vercel Blob
- **Cloud, Auth & DevOps:** AWS, GCP, Docker, GitHub Actions, Vercel, Netlify, Auth0, Clerk, Okta, Sentry, Datadog
- **Testing & Code Quality:** Jest, React Testing Library, Cypress, Playwright, Testcafe, ESLint, Prettier, SonarCloud, Cross-Browser Testing
- **Architecture & Methodology:** Micro-frontends, SOLID Principles, Domain Modelling, Design Patterns, Monolithic Architecture, Agile/Scrum
- **Blockchain & Web3:** Smart Contract Development, Solidity, Web3.js, [Ethers.js](#)
- **Version Control & Collaboration:** Git, GitHub, GitLab, Jira, ClickUp, Figma, Slack

PROJECTS

Project : Mercanis

Link : <https://www.mercanis.com/>

Description

- Mercanis is an AI-powered procurement platform that simplifies complex sourcing and compliance management for enterprises
- Built and maintained core frontend modules handling multi-step procurement workflows with complex state and conditional decision trees
- Leveraged AI capabilities within the platform to surface critical data points, helping users make faster and more informed procurement decisions.
- Collaborated closely with product and design to deliver clean, intuitive interfaces over inherently complex business logic.
- Integrated Claude Code into the development workflow to accelerate feature delivery and maintain consistent code quality.

Project : Santiment

Link : <https://app.santiment.net>

Description

- Built the Santiment web app using SanUI, the core component library that houses small, reusable React components.
- Created robust, reusable components adhering to TDD principles, which resulted in reduced testing time.
- Implemented storybook for improved collaboration efficiency among 10+ developers on concurrent projects.
- Aimed to provide a solid foundation for Santiment's development, promoting scalability and design coherence.
- Designed responsive layouts for Santiment, optimizing the experience across various screen sizes.

Project : GQTY

Link : <https://gqty.dev/>

Description

- Highlighted Gqty's strengths, including type safety, efficient queries, and automatic code generation.
- Demonstrated seamless integration of Gqty with popular JavaScript frameworks such as React, Vue.js, and Angular to enhance the GraphQL development experience for developers.
- Ensured WCAG-compliant accessibility in all components while building reusable UI libraries.

Project : Dechea

Link : Temporarily unavailable (previously: <https://www.dechea.com>)

Description

- Dechea is a dental practice platform with a modern approach to keeping patients at the center of everything.
- This platform helps to create medical findings and cost estimates in less than 10 minutes.
- Ensure GDPR compliance when working with patient file management.
- Developed components tested for cross-browser compatibility using tools like BrowserStack.
- Collaborated with UI/UX teams to implement intuitive interfaces and user flows for Dechea.

EXPERIENCE

Mercanis

Remote

Sr. Frontend Engineer

June 2024 - Present

- Architecting and developing scalable frontend features for a complex AI-powered procurement platform, ensuring high performance and maintainability across the codebase.
- Conducting thorough PR reviews to uphold code quality standards and drive engineering best practices across the team.
- Integrated Claude Code into the development lifecycle, reducing repetitive work and improving throughput across feature delivery.
- Actively participating in sprint planning, backlog grooming, and requirement gathering sessions within an Agile/Scrum framework.
- Collaborating with cross-functional teams to translate complex procurement workflows and AI-driven decision logic into intuitive, user-facing interfaces.

Dechea

Remote

Serverless Project Architect and Sr. Frontend Engineer

Sep 2022 - May 2024

- Spearheaded the adoption of new tools and technologies, improving development efficiency and achieving clean code coverage.
- Authored and integrated browser automation test cases into the pipeline, ensuring the identification of failing features before production deployment.
- Partnered with the product owner and scrum master to refine requirements, optimize backlog processes, and streamline sprint planning.
- Led sprint planning and backlog grooming sessions within an Agile/Scrum framework.

HashiCorp

Remote

Frontend Architect

Apr 2021 - Aug 2022

- A video conferencing platform with real-time features like chat and live Q&A.
- Directly collaborated with the CEO and Product team to prototype, design, and deliver the UI and UX experience with a lean design process: research, design, test, and iterate.
- Led a team of 7 React developers to successfully deliver within a challenging 45-day deadline.
- Gained hands-on experience with Firebase services through real-world development and integration

Santiment

Remote

Frontend Developer

Jan 2020 - Mar 2021

- Built a crypto platform enabling users to track and monitor assets of interest, with real-time updates on the latest crypto market trends.
- Developed and deployed reusable UI components using Storybook, ensuring cross-browser compatibility and integrating them into San-UI, Santiment's internal component library.
- Collaborated with designers to identify reusable components for upcoming initiatives and strategically planned sprints for component development.

Redacted

Remote

Frontend Developer

Aug 2018 - Dec 2019

- An injectable lead generation platform for kitchen-selling companies.
- Directed SDLC management using Agile methodologies, maintained deliverables, and consistently contributed to platform expansion.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science

Aug 2014 - Jul 2018

Astral Institute of Technology and Research
